SUMMARY

Experienced ERP Technical Consultant and Software Engineer with over 10 years of expertise in developing innovative solutions that drive business success. Proficient in SuiteCloud, Celigo integrations, and various backend development technologies. Adept at designing, coding, and optimizing custom solutions with strong debugging and troubleshooting capabilities. Recognized for exceptional client deliverables, meticulous documentation, and streamlined project execution.

TECHNICAL SKILLS

- **ERP Platforms:** NetSuite SuiteCloud (SuiteFlow, SuiteBuilder, SuiteScript), NetSuite Analytics Warehouse
 - **Integrations:** Celigo Integrator.io, SOAP, REST APIs, GraphQL, SFTPs, EDI
 - **Programming Languages:** JavaScript, Apache Freemarker, C#.NET, VB.NET, ASP.NET, VBA, VBScript, VB6, PHP
 - **Databases:** SQL (T-SQL, PL/SQL), MySQL
 - **Frameworks and Tools:** Microsoft .NET, PowerShell, Windows Workflow Foundation, QGIS, Bootstrap, Handlebar.js, charts.js, node.js
 - **Version Control:** TFS, SVN, PVCS, SourceSafe, Git, BitBucket
-

CERTIFICATIONS

- Celigo Core Builder Certification
 - Celigo integrator.io Mastery Levels 1–4: Skilled, Seasoned, Master, Legendary
 - Celigo NetSuite Integration Whiz (Salesforce, Shopify)
 - Civil Service Examination - Professional Level
-

PROFESSIONAL EXPERIENCE

NetSuite Integration Developer

Business Solutions Partner | April 2025 - Present

- Develop and maintain integrations between NetSuite and external systems using SuiteTalk (SOAP/REST), RESTlets, and middleware platforms such as Celigo or Dell Boomi.
- Design and document integration architecture, workflows, and data mappings to support end-to-end business processes.
- Build and deploy SuiteScript 2.0/2.1 solutions including User Event, Scheduled, Map/Reduce, and Suitelet scripts to automate business logic.
- Implement and manage data synchronization between NetSuite and third-party platforms (e.g., Shopify, Salesforce, 3PL, banking systems).
- Create and optimize saved searches, custom records, and scripts for efficient data extraction and manipulation.
- Perform end-to-end testing, debugging, and optimization of integrations to ensure reliability and performance.
- Monitor and troubleshoot integration errors, ensuring data integrity and compliance with business requirements.
- Collaborate with cross-functional teams to analyze requirements and deliver scalable, maintainable integration solutions.
- Document technical specifications, API workflows, and integration configurations for future maintenance and knowledge transfer.

NetSuite Technical Consultant/Developer

Atticus Advisory Solutions Inc. (under Moss Adams engagement) | January 2022 – April 2025

- Designed and implemented custom NetSuite solutions utilizing SuiteScript 2.0/2.1 to automate business processes, improve system workflows, and address client-specific requirements.
- Developed robust integration workflows using Celigo Integrator.io, SOAP, and REST APIs, ensuring seamless data flow between NetSuite and external systems such as CRMs, ERPs, and third-party applications.
- Performed in-depth debugging and troubleshooting of SuiteScript implementations, resolving code issues and optimizing performance to meet client objectives.
- Crafted comprehensive client deliverables, including detailed technical designs, unit/integration test plans, and deployment documentation.
- Configured SuiteCloud tools such as SuiteFlow and SuiteBuilder to enhance system functionality, including creating custom fields, records, and workflows tailored to specific business needs.
- Executed SQL development with a focus on PL/SQL to extract, manipulate, and analyze data for reporting and operational insights.
- Conducted code reviews, implemented version control best practices, and ensured proper configuration management for all project deliverables.
- Provided technical expertise and consultation on NetSuite scripting, integrations, and customizations to help clients maximize their ERP investment.

Principal Technical Consultant, Advanced Customer Support

Oracle NetSuite | January 2019– January 2022

- Delivered advanced post-implementation solutions for high-priority accounts, ensuring optimal performance and scalability of NetSuite configurations.
- Created and deployed SuiteScript 2.0/2.1 scripts to automate complex processes, including revenue recognition, inventory management, and order-to-cash workflows.
- Managed technical queries from partners and vendors, providing expert-level guidance on scripting, integration, and system architecture.
- Collaborated with cross-functional teams to analyze existing client setups and proposed actionable recommendations for script optimization, performance tuning, and data integrity.
- Acted as an Engineering Solutions Manager, overseeing the technical aspects of customer accounts and ensuring alignment with business objectives.

Software Engineer

RightCrowd | January 2018 – December 2018

- Developed and enhanced enterprise-level security software products using C#.NET and ASP.NET frameworks, delivering tailored solutions to clients in the security industry.
- Implemented RESTful APIs and web services for seamless integration between security applications and external platforms.
- Designed and optimized SQL queries and stored procedures using T-SQL to support application performance and reporting requirements.
- Utilized XML and Windows Workflow Foundation to build scalable, maintainable workflows for business-critical processes.

Software Engineer

Accenture | April 2015 – January 2018

- Automated application monitoring and performance analysis using custom-built tools developed in C#.NET and VBA.
- Identified and resolved critical defects in supported applications, implementing long-term fixes and enhancements to improve system reliability.
- Designed and optimized SQL scripts and stored procedures to handle large-scale data operations efficiently.
- Collaborated with teams to integrate middleware technologies such as ETL Informatica and Tivoli Workload Scheduler into enterprise systems.
- Generated dynamic Crystal Reports for real-time data visualization and decision-making support.

IT Analyst/Developer

Green Future Innovations, Inc. | September 2014 – February 2015

- Developed and deployed custom business applications in VB.NET to streamline company operations and reduce manual workloads.
- Designed normalized SQL database structures, including tables, views, and stored procedures, for efficient data management.
- Conducted system testing and troubleshooting to ensure reliability and user satisfaction.

Education

University of Saint Louis Tuguegarao

Bachelor of Science (B.S.), Information Technology
2009 - 2014

University of Saint Louis Tuguegarao

Bachelor's Degree, Undergraduate, Computer Science
2009 - 2014

University of Saint Louis Tuguegarao

Associate's Degree, Computer Technology/Computer Systems Technology
2009 - 2013
